

## ASSUMPTIONS

1. There are 35 lectures and 21 assignments. The Assignments are lab sessions. It is not required that you do the labs, but it can be beneficial.
2. The last 3 lab sessions are worthy of your time. Please watch.
3. I designed this course that you may use for future reference. I hope this is true for you.
4. It is my intention to update this course with other RF Concepts, such as, Desktop testing, SAP testing, and mobile testing.

## INFORMATION

I want to use this resource file to mention items that I think needs to be said.

1. I noticed that when I add resource files to my assignment or lab sessions, the file link does not appear as it does for the lectures. I usually have a resource file for part one of each lab session.

To see it, click on the assignment link.

- a) Look in the left panel
  - b) There should be a red link labelled "Start Assignment"
  - c) This will enable the video and the resource file link in the left panel
2. My resource files look better opening them in NOTEPAD++. The URL links can be seen and are clickable. You just have to double-click the link.
