ASSUMPTIONS

<1> Open PyCharm

<2> Open a Robot Framework script:

    <a> ExploratoryTest2_Yahoo.robot (current)

    <b> ExploratoryTest3_Yahoo.robot (enhanced)

<3> Redefine the Start Test and End Test Keywords as Test Setup, Test Teardown, Suite Setup, and Suite Teardown

<4> Break up code action to use Test Setup and Test Teardown operations instead of the Suite keywords

<5> Run test and review results

INFORMATION

PYCHARM PROJECT: Demo2   DIRECTORY: TestSuite (The script names start with Exploratory...

The scripts are available in the resource file for Lecture 7. Sorry for any confusion. :)
